Progress in Camera-Based Document Image Analysis

The emerging area of camera based document analysis can benefit a lot from the recent results in projective geometry of planar (and even non planar) surfaces [4].

Perspective Correction Methods for Camera-Based Document

Camera-captured images can suffer from low resolution, blur, and perspective distortion, as well as complex layout and interaction of the content and background. In this paper we present a survey of application domains, technical challenges, and solutions for the analysis of documents captured by digital cameras.

Camera-based analysis of text and documents: a survey

Camera Based Document Analysis And Recognition 5th International Workshop Cbdar 2013 Washington Dc Usa August 23 2013 Revised Selected Papers Lecture Notes In Computer Science ... manual 1997 1999 pdf camera based document analysis and recognition 5th international workshop

Document for Camera Based Document Analysis And

Intended to give a snapshot of the state-of-the-art research in the field of camera based document analysis and recognition, the papers are organized in topical sections on text detection and recognition in scene images, and camera-based systems.

Camera-Based Document Analysis and Recognition

Camera-Captured Document Image Analysis A Thesis Submitted for the Degree of Doctor of Philosophy in the Faculty of Engineering by Thotringam Kasar ... In this thesis, we study some of the issues commonly encountered in camera-based image analysis and propose novel methods to overcome them. All the methods

Camera-Captured Document Image Analysis

Traditional scanner-based document analysis techniques provide us with a good reference and starting point, but they cannot be used directly on camera-captured images.

Camera-Based analysis of text and documents: a survey. Int

is based on our recognition method [1], [2] and the method is applied to image sequences captured with a web camera. Figure 1 shows an overview of the recognition method.

2013 Camera-Based Document Analysis and Recognition

This article proposes a specially designed composite target and an automatic analysis tool for image quality inspection of camera-based document/object capture systems. The target and analysis tool can be used during product development, as well as on the manufacturing line for real-time inspection.
