Different methods may correspond to different models. Modelling is a science which needs creative ability linked to a deep knowledge of the whole variety of methods offered by applied mathematics.

Lecture Notes on Mathematical Modelling in Applied Sciences

With its policy of attracting papers representing a broad range of interests, the journal covers such topics as algorithms, approximations, combinatorial and geometric probability, communication networks, extreme value theory, finance, image analysis, inequalities, information theory, mathematical physics, molecular biology, Monte Carlo methods, order statistics, queuing theory, reliability theory, and stochastic processes.

Methodology and Computing in Applied Probability - Springer

develops, analyzes and applies methods from scientific computing to several fields including analysis, linear algebra, geometry, approximation theory, functional equations, optimization and differential equations.

problems, parallel computing, optimization, probabilistic and stochastic approaches. CMAME publishes original papers at the forefront of modern research describing significant developments of computational methods in solving problems of applied mechanics and engineering.

MECHANICS AND ENGINEERING COMPUTER METHODS IN APPLIED

Methodology and Computing in Applied Probability publishes high quality research and review articles in areas of applied probability that emphasize methodology and computing. The journal focuses on articles that

examine important applications and that include detailed case studies.

Introduction To Numerical Methods In Differential

Computational Methods in Engineering brings to light the numerous uses of numerical methods in engineering. It clearly explains the application of these methods mathematically and practically, emphasizing programming aspects when appropriate.
