Contemporary Catalysis Science Technology And Applications

Encompassing an integrated approach to the various aspects of catalysis, covering heterogeneous, homogeneous, organo-, bio-, and computational catalysis, as well as reaction and reactor engineering on an advanced level, this textbook is ideal for graduate students with diverse backgrounds, including catalysis, engineering, and organic synthesis.

Contemporary Catalysis Science Technology And Applications

Covering the basic principles, this book presents aspects of homogeneous, heterogeneous, organo-, bio- and computational catalysis. It discusses catalyst preparation, catalyst characterisation and reactor engineering and explores recent developments in the understanding of catalytic mechanism, such as operando spectroscopy.

Catalysis Science & Technology

ACS Catalysis and the ACS Division of Catalysis Science & Technology are pleased to announce that Professor John Hartwig, the Henry Rapoport Professor of Chemistry at the University of California, Berkeley has won the 2013 ACS Catalysis Lectureship for the Advancement of Catalytic Science, in recognition of his many and varied recent achievements.

Awards - Catalysis Science & Technology

Catalysis Science & Technology is a leading international journal for the publication of the highest impact articles reporting cutting-edge developments across the catalysis science community. The journal places equal focus on publications from the heterogeneous, homogeneous, organocatalysis and biocatalysis communities, containing a balanced ...

Catalysis Science & Technology

Editorial Our series of books on Catalysis: Science and Technology is by now complete. Its purpose has been to collect authoritative and, if possible, definitive chapters on the main areas of contemporary pure and applied catalysis.
